Pune	129	3.15 ★★☆☆☆		Manager

Key insights & trends

Consistent hiring growth Headcount grew from 271 hires in 2024 to 347 in 2025 (+28%), sustaining momentum with 342 in 2026, indicating planned workforce scaling rather than reactive hiring.	Near-perfect gender parity Female (50.1%) vs Male (49.9%) split is remarkably balanced organization-wide — a strong DE&I signal, especially in IT Support which skews female (57%).
Marketing leads performance Marketing department averages 3.26/5 — highest across all departments. HR scores the lowest at 2.80, suggesting a need for internal enablement programmes targeting HR staff.	Pune shows edge in performance Pune employees average 3.15/5 vs Hyderabad's 2.95. With 129 employees, Pune's higher output-per-head ratio warrants closer study for replicable practices.

Future growth projections & recommendations

Workforce will cross 1,300 by mid-2027 At the observed rate of ~29 hires/month, the organization is on track to add 350+ employees annually. Scaling HR and onboarding capacity is critical.	Performance uplift opportunity 40% of employees rate 4–5, but 39% rate 1–2. Targeted L&D programs for Consultants (avg 2.84) and Developers (2.91) could lift overall org performance by ~0.2–0.3 points.
Geographic diversification Currently Hyderabad-heavy (16.2%). Expanding hiring in Mumbai and Kolkata (both under 14%) reduces concentration risk and taps wider talent pools.	Intern-to-hire conversion Interns (142, avg rating 3.09) outperform Analysts and Developers. A structured conversion pipeline could reduce external hiring cost while retaining institutional knowledge.
